

AL160

PROFILE SCOOTER LIFT

SEE THE VIEW, NOT THE LIFT

The open platform design of the AL160 creates a simple, streamlined silhouette. Its understated presence on a vehicle is stylish and ideal for compact cars.

Harmar's AL160 Profile Scooter Lift safely and securely transports power scooters with a wheelbase between 30" and 42" – no scooter modifications needed. The automatic hold-down foot secures your scooter automatically with the push of a single button. Even larger power scooters can be transported with this profile lift – up to 350 lb.

Single switch operation and key lock

Hold-down foot

The AL160 profile lift is ideal for my scooter. Its open platform frame allows for great visibility when driving without my scooter and has plenty of capacity for when I need to take it along.

Rear wheel cradle
